Single-Tooth UN for Aluminum

ZANHO Cutting Tools

Feature

- **Non-Stick Aluminum Specialist:** Specifically engineered with mirror-polished, **Uncoated (Bright)** flutes to provide the lowest friction and effectively eliminate chip welding (BUE).
- **UN Standard Expertise:** Precision-ground for high-accuracy American Unified Threads, covering **UNC (Coarse), UNF (Fine), and UNEF (Extra Fine)** standards.
- **Superior Mirror Finish:** The ultra-sharp cutting edge ensures burr-free thread profiles and a high-gloss surface finish in all non-ferrous metals.
- **Broad Capacity Range:** Extensive specs covering ultra-fine **#0-80UNF** threads up to large **1"** industrial components.
- **Material Compatibility:** Highly suitable for **Aluminum Alloy, Copper, Graphite, and Plastics** (Workpiece Category N) with diameters from D0.73 to D16.

Descriptions
