

VNMG-YM-TP9502A

Product Images

Summary

Features and benefits

- Double rake design to ensure cutting sharpness and strength requirements
- Convex chip breaking structure to achieve chips under different depth of cut and feed processing capacity;
- Large side grooves, large chip space, prevent chip accumulation

YM

•Double rake angle design ensures cutting sharpness and strength requirements.
 •Hollow chip breaking structure to achieve different depth of cut and feed of chips processing capacity.
 •Large chip space, large chip space, prevent chip accumulation
