

# WNMG-YM-TP9502A

## Product Images

## Summary

### Features and benefits

- Double rake design to ensure cutting sharpness and strength requirements
- Convex chip breaking structure to achieve chips under different depth of cut and feed processing capacity;
- Large side grooves, large chip space, prevent chip accumulation

YM

※Double rake angle design  
ensures cutting sharpness  
and strength requirements;  
※Notched chip breaking  
structure to achieve different  
depth of cut and feed of chips  
processing capacity;  
※Large chip groove, large chip  
space, prevent chip accumulation
