

TNMG-YM-TP9502A

Product Images

Summary

Features and benefits

- Double rake design to ensure cutting sharpness and strength requirements
- Convex chip breaking structure to achieve chips under different depth of cut and feed processing capacity;
- Large side grooves, large chip space, prevent chip accumulation

YM

•Double rake angle design
ensures cutting sharpness
and strength requirements;
•Notched chip breaking
structure to achieve different
depth of cut and feed of chips
processing capacity;
•Large chip groove, large chip
space, prevent chip accumulation
