

MKR-Boring Cutter

Product Images

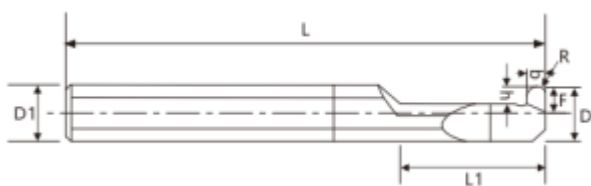

MKR
BORING CUTTER

Summary

- **Internal R Specialist:** Specifically engineered for ultra-fine **Internal Corner Rounding and Deburring** in small diameters, ensuring a safe and professional finish on internal hole edges.
- **Precise Radius Options:** Features precision-ground tip radii including **R0.5, R0.75, and R1.0**, allowing for consistent and accurate internal radius profiles.
- **Optimized for Finishing:** Specialized tool geometry minimizes vibration and tool deflection, ensuring strict dimensional accuracy and a high-quality surface finish in internal cavities.
- **Workpiece Compatibility:** Highly effective for processing Carbon Steel, Alloy Steel, Stainless Steel, and Hardened Materials.
- **Comprehensive Sizing:** Available in processing diameters from D4.0 to D8.0 with varied effective lengths (L10 to L22) to meet diverse precision machining needs.
