PC

—— Chip-breaker ——

Summary

ZANHO WNMG0804-PC series is a robust **80° trigon negative turning insert** specifically designed for **Medium Machining**. Featuring the specialized **PC chipbreaker**, it delivers

exceptional chip control and stable cutting performance across a wide range of cutting depths, making it ideal for high-efficiency turning of steel and alloy components.

Content

Key Performance & Features

- **Medium Machining Excellence:** Optimized for semi-roughing to medium machining operations, providing a perfect balance between chip breaking and edge durability.
- **PC Chipbreaker:** Engineered for stable chip evacuation even at higher feed rates, effectively reducing cutting resistance and heat buildup.
- **Trigon Stability:** The WNMG negative design utilizes 6 robust cutting edges, maximizing cost-efficiency while ensuring superior strength during continuous or slightly interrupted cuts.
- **Strong Cutting Edge:** Precision-ground edges enhance tool life and surface finish, ideal for maintaining consistent quality in long-running turning tasks.

Technical Specifications

Model	Radius (re)	Feed (fn)	Cut Depth (ap)
WNMG080408-PC	0.8 mm	0.15 - 0.50	0.5 - 4.0 mm
WNMG080412-PC	1.2 mm	0.20 - 0.80	1.5 - 5.0 mm

Need Help Selecting the Right Grade?

Our sales team can recommend the optimal grade based on your workpiece material and machining conditions.
