ZANHO Cutting Tools

PM

—— Chip-breaker ——

Feature

ZANHO CCMT-PM series is a professional **80° rhombic positive turning insert** specifically designed for **Medium Machining**. Featuring the balanced **PM chipbreaker**, it delivers stable

cutting performance and consistent chip evacuation across a wide range of cutting depths (0.2-4.0mm), making it an ideal choice for general-purpose turning of steel and alloy components with high reliability.

Descriptions

Key Performance & Features

- **Medium Machining Excellence:** Specifically optimized for medium turning operations, providing a perfect balance between cutting efficiency and edge durability.
- **PM Chipbreaker Geometry:** Engineered for stable chip breaking across a versatile range of feed rates, effectively preventing chip accumulation and surface marring.
- **Positive Rhombic Design:** The 7-degree positive clearance reduces cutting resistance and heat buildup, ideal for smaller lathes and delicate workpiece machining.
- **Stable Tool Life:** Precision-ground cutting edges enhance surface finish and machining reliability, ensuring consistent quality in long-running turning cycles.
