

Diamond Coated Corn Router Bit

ZANHO Cutting Tools

DCEN

CARBIDE CUTTER

Feature

- **Extreme Durability: Graphite and Highly Abrasive Composites**, featuring a premium diamond coating that extends tool life up to 10x longer than standard bits.
- **High-Hardness Coating:** The advanced **Diamond Coating** provides superior red-hardness and wear resistance, maintaining sharp cutting edges in the toughest materials.
- **Diamond-Cut Performance:** Multi-tooth **Corn Router (Burr Style)** design effectively breaks chips into fine dust, reducing cutting temperature and preventing workpiece delamination.
- **Workpiece Compatibility:** Optimized for **PCB (FR-4), Carbon Fiber, Graphite, Bakelite**, and high-silicon aluminum alloys.
- **Industrial Standard:** Offers standard **3.175mm (1/8")** shanks for standard CNC spindles and larger industrial diameters up to 12mm.
