ZANHO Cutting Tools

KNA750M-2S

CARBIDE MICRO END MILLS

Feature

- **Micro Precision Expert:** Engineered for ultra-precise **Micro Machining** tasks, delivering exceptional accuracy for intricate details and small-diameter profiles.
- **Premium AlCrN Coating:** Features advanced **AlCrN Coating** for superior thermal stability and wear resistance, maintaining edge integrity in demanding environments.
- **Ultra-Small Diameter Range:** Available in precision-ground cutting diameters from **0.1mm to 0.9mm** (D0.1-D0.9) to meet diverse micro-milling needs.
- **Stable Geometry: 30° Helix Angle** provides the optimal balance between tool strength and efficient chip evacuation for small diameter applications.
