

30XD Internal Coolant Drills

ZANHO Cutting Tools

ICD-30D

CARBIDE DRILLS

Feature

- **Extreme Depth-to-Diameter Ratio:** Features a specialized **30xD Ratio**, specifically engineered for drilling ultra-deep holes in a single, stable CNC operation with high straightness and dimensional accuracy.
- **High-Pressure Through-Coolant:** Equipped with **Two Internal Coolant Holes** to deliver high-pressure fluid directly to the tip, ensuring continuous cooling and high-speed chip ejection at extreme depths.
- **Replace Traditional Processes:** A high-efficiency alternative to slow deep-hole processes like gun drilling, offering significantly shorter CNC cycle times.
- **Maximum Rigidity:** Made from premium sub-micron grain carbide with a specialized flute profile to minimize vibration and tool deflection even at 30xD depths.
- **Precision Size Range:** Available in precision cutting diameters from **4.0mm to 8.0mm**, with overall lengths reaching up to **303mm**.
