HRC60-4SN

ZANHO Cutting Tools

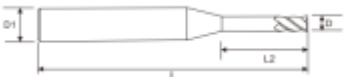

Feature

- **Deep Reach Specialist:** Engineered with a **Long Neck** design specifically for stable **Deep-Pocket and Narrow-Slot** milling where standard length tools cannot perform.
- **4-Flute High Stability:** 4-flute design provides superior tool rigidity and better surface finish compared to 2-flute options, ideal for fine finishing in deep cavities.
- **Premium TIAISIN Coating:** Advanced TiSiN coating provides exceptional heat resistance and tool life for maintaining edge integrity in steel machining.
- **Optimized Clearance:** The reduced neck diameter ensures smooth machining without tool interference or collision during deep-profile work.
- **Extensive Specs:** Available in diameters D1 to D3 with diverse effective neck lengths (L2 up to 25mm) for specialized CNC tasks.
