HRC60MA-2S

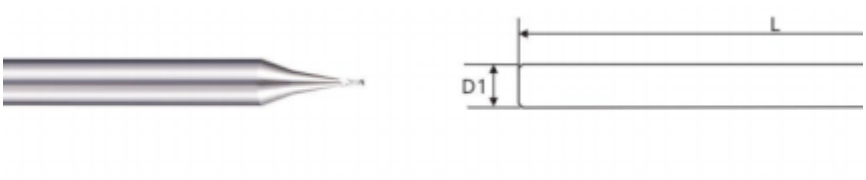

ZANHO Cutting Tools

Feature

- **Aluminum Specialist:** Engineered specifically for high-precision **Aluminum Alloy** and non-ferrous metal micro-machining.
- **Ultra-Small Diameters:** Available in high-precision cutting diameters from **0.1mm to 0.9mm** (D0.1-D0.9) for intricate detail work.
- **Sharp Cutting Edge: Uncoated (Bright)** finish ensures the sharpest possible cutting edge, effectively preventing chip welding and heat buildup in soft metals.
- **Optimized Stability: 30° Helix Angle** provides the perfect balance between tool rigidity and efficient chip removal in micro-diameter applications.
- **Workpiece Compatibility:** Best suited for **Aluminum, Copper, Plastic**, and other non-ferrous materials (Workpiece category N).
