HRC65M-2B

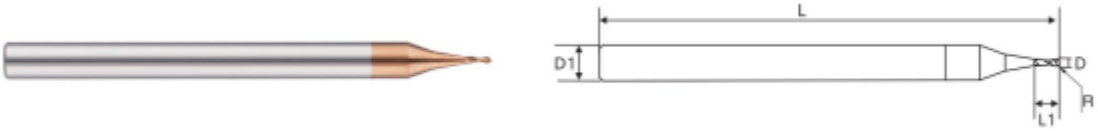

ZANHO Cutting Tools

Feature

- **3D Micro-Machining Specialist:** Specifically engineered for ultra-fine **3D Profiling** and intricate contouring in hardened steels and mold components.
- **Precision Micro Radii:** Available in micro radius sizes from **R0.05 to R0.45** (D0.1 to D0.9 mm) to meet the most exacting machining specifications.
- **Advanced Thermal Protection:** Features high-performance **TiAlSiN Coating** for exceptional red-hardness and wear resistance, maintaining edge integrity in hard steel.
- **High HRC Stability:** Capable of stable processing for workpieces with hardness **up to 58 HRC** (optimized for HRC48-55 range).
