Inner R Cutter-Alu.

ZANHO Cutting Tools

Feature

- **Aluminum Edge Expert:** Specifically engineered for creating ultra-smooth **Convex Radii** on aluminum components, providing a professional, burr-free finish.
- **Mirror-Finish Results: Uncoated (Bright)** polished surface ensures the sharpest possible cutting edge and prevents material buildup (BUE) during high-speed machining.
- **Broad Radius Selection:** Available in a wide variety of radii from **R0.5 to R8.0**, suitable for diverse industrial and decorative edge-rounding tasks.
- **Material Compatibility:** Highly recommended for **Aluminum Alloy, Copper, and Plastics** (Workpiece category N) with exceptional performance.
- **Massive Size Range:** Full range of shank diameters from D4 to D20 to match your specific precision CNC machining needs.

Descriptions

Aluminum Order Number	Specification	D	
IRA-4R-04005	D4R0.5*D4*50L*4F	4	
IRA-4R-04010	D4R1*D4*50L*4F	4	
IRA-4R-06010	D6R1*D6*50L*4F	6
