ZANHO

LEM-2B

CARBIDE CUTTER

Feature

- **Undercutting Expert:** Features a **360° Spherical Cutting Edge** and a relieved neck, specifically designed for machining undercuts, back-chamfers, and complex 3D contours.
- **Premium TIAISIN Coating:** Advanced TiSiN coating provides exceptional red-hardness and wear resistance, maintaining sharp cutting edges in high-speed steel machining.
- **Multi-Axis Optimization:** Ideal for **5-Axis CNC Machining** where tool reach and multi-directional cutting are essential for intricate part geometries.
- **Extended Reach Options:** Includes the **LEM-2BH series** with overall lengths up to 100mm for deep-cavity components and specialized tooling requirements.
